

COMPUTING: CREATING MEDIA- Video Editing

Y5

KNOWLEDGE ORGANISER

Sticky Knowledge

Video Editing

- Use different camera angles
- Use trim and crop to edit a video
- Identify videos can be improved through and reshooting or editing

Features of Videos

Videos present moving images, often accompanied by sound. The following features are commonly found in videos.

Plot means the main events in the video, shown in a sequence. Plot features are caused by and affect one another.

Most videos, even very short videos, try to give the audience a **message**. This may be obvious or hidden.

Dialogue is the name given for the conversations between people in video texts.

Common Themes:
courage
honesty
love
friendship
forgiveness
loyalty
hope
equality
hard work
teamwork

Themes are the main ideas that run through the video, e.g. love, friendship, magic, violence.

Props are the moveable objects that are used by the actors/ actresses in video texts.

Characters are the different people and animals in a story, including in a video.

Editing Videos

Windows Movie Maker is one example of a video editing tool, but many others are available. Examples include WeVideo, Nero Video, and Apple iMovie.

In order to edit your video, you first need to import it from your device to the computer. You then need to import it into Movie Maker by clicking 'Add videos and photos.'

By right-clicking on the video thumbnail, you can choose to 'split' the video into pieces. The different pieces can be moved or deleted.

The **trim tool** allows you to move excess video from the beginning or the end.

A number of **special effects** are available, including using **animations and transitions** between shots. You can also add **text in captions**.

Remember to save your project regularly. You need to save your project as a *.wmv file so that you can continue to edit it.

Recording Videos

Static Camera: The camera is in a fixed position, sometimes using a stand or tripod. Examples of this in use are during news-reading and weather forecasts.

Zooming: Zooming in means to give a closer view of the subject. Zooming out gives us a further, broader view of the subject. Zooming too close can make the subject appear blurry.

Pan: The camera position is fixed, but moves from side to side.
Tilt: The camera position is fixed, but moves up and down.

Top Tips for Recording High-Quality Videos

- Use considered lighting.
- Think carefully about the sounds that you will use, e.g. music and sound effects.
- Think about the use of colour.
- Consider the use of a green screen for settings.

Devices for recording video:

iPads/tablets/smartphones
Camcorders or Cameras
